### Engineering software kit description

|  |    |
|--|----|
| 1. General information                             | 3  |
| 2. Linear algebra                                  | 5  |
| 3. Nonlinear algebra and analysis problems         | 14 |
| 4. Numerical integration and interpolation         | 23 |
| 5. Optimization on networks and linear programming | 27 |
| 6. Array sorting                                   | 41 |
| 7. Statistics                                      | 43 |
| 8. Conclusion                                      | 52 |

### Game programs description

|                     |    |
|---------------------|----|
| 9. Package contents | 53 |
|---------------------|----|

### System software description

|                                |    |
|--------------------------------|----|
| 10. Brief programs description | 60 |
|--------------------------------|----|
